With reference to your
Docket No 1514 dated
7th December 93 to the
address of the Deputy
Commissioner forwarding
for opinion an applica-
tion from the residents
of Dodda Mavalli and
other villages of Banga-
lore praying for the
establishment of a
Dispensary in their
villages, I have the
honor to state that

a

a similar petition received by me was sent to you with this Office No. 994 dt 11th December 93 for favor of your advice with the intention of bringing forward the petition with your opinion for disposal by the Board at a meeting.

Should you however wish to know my individual opinion I shall be most happy to express it, but it will be liable to be modified in reference to the cost of which you are the best judge. These villages are within Municipal limits and are not very far from the Market Dispensary or the present Govt. Hospital by the Lal-Bagh and Mission Roads. If a small dispensary can be established at a small cost the prayers of the petitioners may perhaps be granted. But a new dispensary is not absolutely necessary.

I have the honor to be
Sir
Your most obedient Servant

Respected Sir,

We the undersigned residents of the Villages of Doddamavally Chickmavally Hooparhalli, Hankanpollies, Siddapoor & Yedyoor of the Bangalore, bring to your honors kind notice, that much inconvenience is being felt by us for want of proper medical aid, in or near our villages. Most of our villages though within the City Municipality, are far from the medical institutions inside the City, and consequently while the Strong and able bodied poor, though with great difficulties and inconvenience resort to these institutions, at times of illness, the weaker poor, & those suffering from severe types of disease, are physically prevented from doing so, and the result, which our experience has shown us, is that we are either to be devoid of all treatment, and risk our lives, or seek the assistance of one or 2 resident quacks whose modes of treatment are far inferior & dangerous. —

We beg also to state that the farthest distances from our villages to the [illegible] & the St Marthas Hospital, which are the nearest located medical institutions, is about 3 to 5 miles respectively. It will be seen therefore, that it is not practicable for a patient of one of our villages, to resort daily to these medical institutions for treatment, without great danger & cost, & this difficulty becomes aggravated when the patients is either poor or

These villages comprise a population of nearly 4900 inhabitants and the annual mortality from these may roughly be estimated at Rs. 200/—

We beg most respectfully also to state that the rate of mortality in these villages is growing high every year. This is due more to the want of timely & proper medical aid, than to the prevalence of any particular disease or to want of any measure of sanitation.

We have therefore ventured today to lay our grievances before your honor with a view to some arrangements being made to locate an Hospital Assistant in a convenient locality amidst our villages & thus confer on us the greatest blessing of health. —

For which act of generosity we shall ever pray for your honors long life & prosperity.
